

SCIENCE

SCI 202

This is a course for Year 12 students who want to excel in general science. The course offers a combination of Level 1 and Level 2 internal 1 Achievement Standards. The course emphasizes practical skills and applying scientific knowledge.

These include:

Ecological patterns
Horticulture
Biological Processes
Using a Microscope
Chemistry and the Environment
Chemical Reactions
Interpreting Geological Information
Technology and Science

Further information can be obtained from Mr Reddington or Mr McMillan
