

"No Power Day"

No Power Day held on Thursday [7th June 2012] was a wonderful initiative by the Enviro team and Dr McMillan to raise awareness of environmental issues. Students and teachers explored new ways to learn without using electricity (computers, lighting, projectors). The mufti day proceeds were \$264.70 This money will be spent on posters and stickers for light switches reminding us to turn them off if they don't need to be on. Many thanks to students, parents, caregivers and teachers for making this such a successful day.
