

TECHNOLOGY

[10TEC]

Year 10 Technology is designed to provide students with a wide range of skills which will enable them to enter Year 11 Technology with confidence.

Students will be taught research and design skills and will use these skills to design a number of unique, interesting projects.

Exposure to a wide range of tools, machinery, materials and processes will enable the students to produce high quality projects within the workshop environment.

Due to the variety of interesting project options available, this course is equally suited to both male and female students.

Successful Technology students can enter a number of desirable careers including engineering, building and product design.
